

6 March 1967

NOTE FOR: Carl

SUBJECT : Secrets of Electronic Espionage

1. Some time ago you indicated you would be interested in scanning this book.
2. The book is historical, well written, and generally accurate. In the event that you don't have time to read the complete book, you may find the following short sections of particular interest:

Page 85 - The Invasion of Normandy. You might find these couple of pages like "old home week".

Page 110 - Uninvited Guests from Undersea. An interesting 1-page "war story".

Page 112 - Silencing A Loudmouth. Another interesting 1-page "war story".

Page 134 - Ferrets In Action. This is a pretty fast summary on 3 or 4 pages about the number of airmen and the US aircraft which were shot down, etc., by the Soviets or their satellites from January 1950 through May 1964.

Page 155 - Modern Radar Deception. This 10-page description does a good job in very simple terms of laying out the basics of [redacted] endeavors; however, the material could be found in any ECM-ECCM book.

STATINTL

Page 184 - Chinese Atom Bomb. This half page tale tells how intelligence experts watched Chinese nuclear developments based on U-2 and A-11 photography.

Page 188 - Cosmos Satellites and Samos Satellites. Fairly interesting with Samos photographic resolution given on page 190 as two feet.

Page 200 - Reading Windowpanes. The last chapter is on  
bugging, and this one paragraph is typical of the material.
